

UV Air Purifier Installation

1. Remove the UV Air Purifier from the box.
2. Using a box cutter, cut out the template on the side of the box. (6.25"x8.25")
3. Trace template on the side of your Top Supply Air Plenum.

4. Cut out the marked area of the Top Supply Air Plenum.

5. Apply the included foam tape around the outer edges of the cut out to act as a seal.

6. Insert UV Air Purifier into the hole so that the bulb is inside the plenum allowing the air to pass over the bulb continuously.
7. Fasten the UV Air Purifier to the Top Supply Air Plenum using supplied metal screws.
8. Plug into 120 Volt source. Turn On.
